

Mirrors

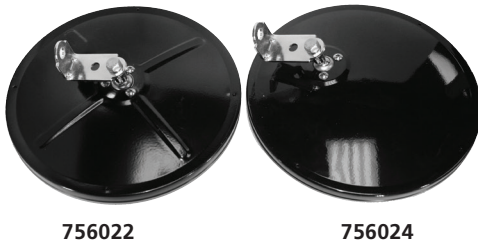

CONVEX MIRROR ASSEMBLIES

TECHSPAN® Convex Mirrors are made with black enamel powder coated steel or stainless steel housings for durability, and are available in both round and rectangular configurations to suit most requirements. PVC extrusion and swaged glass-to-housing construction ensures a good glass to housing fit. Nickel plated ball stud, plated hardware and stainless steel 'L'-type bracket are included in each mirror assembly.

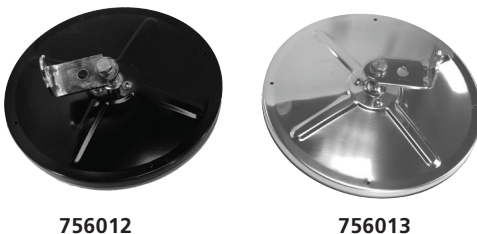

8 1/2" ROUND CONVEX MIRRORS (L-TYPE BRACKET) WITH HEATER (12V)

Part No.	Description	Mounting	Qty/Pkg
